

*Parker
Metal Punch
No. XX*

A TOOL OF REAL MERIT

For punching holes in Sheet Metal A combination Bench and Hand Punch

SHEET METAL WORKERS everywhere will greet this latest addition to the well known line of PARKER PRODUCTS with enthusiasm. It has been designed by expert sheet metal men to fill a long felt want for a light, serviceable Hand Punch—yet which has a wider range than the ordinary run of Punches of this nature.

The idea of having a combination Bench and Hand Punch—enabling one to “take the work to the Punch, or the Punch to the work” will be highly appreciated by users. Where necessary one or more stands can be installed in various parts of the shop, whereby, one PARKER METAL PUNCH NO. XX will do the work of several ordinary machines.

Each punch comes equipped, with one Punch and Die, Bench Stand, Gauge and Adjustable stripper.

Every shop where holes are being punched in sheet metal, should add one or more of these labor-saving Punches to their shop equipment. **IT SPEEDS UP PRODUCTION.**

The exceptionally wide throat and open jaw accommodates formed or beaded edges; and the exposed punching parts enable the mechanic to see exactly where the punching is desired.

COMPACT—Measures but 9 inches over all.

LIGHT—Weighs only 4½ pounds.

POWERFUL—Has a capacity of a ½ inch hole in 20 gauge steel; or equivalent.

The depth of throat to center of Punch is 3½ inches with a height of 2¼ inches. Made of Drop Forged Steel, heat treated.

Write for booklet illustrative of this highly improved Punch.
